- Accurate Flaw Detection
- Uses Standard 110V Power
- Hand Operated Spread and Lift
- Adjustable Work Height

**Includes  
Medium Truck Probe!**

**PATENT PENDING**

## COMPACT, POWERFUL TIRE TESTING!

The Branick BTT Tire Tester has everything you need in a tire inspection spreader. With adjustable bi-directional rotation, adjustable working height and a hand held LED light, inspection is easy. Lots of tool storage and power with 4 air ports and 2 electric outlets. The electronic detector accurately locates flaws that would often be missed by other inspection methods. Foot controls for rotation are located on both sides for ease of use and the auto ramp means you simply roll the tire on. The electric rotation motor reduces noise significantly and the whole thing is compact to save valuable floor space. The BTT has the quality, features and performance you expect from Branick. Made in the U.S.A. at Branick's manufacturing facility in Fargo, ND!
